# GENERAL RECOMMENDATIONS

Take at least one introductory fine art to increase options sophomore year.

Consider Health and Wellness next.

Take a computer science if you want to advance in that area.

Consider at least one study hall during sports or other significant periods of commitment.

# TO SUMMER SCHOOL OR NOT TO SUMMER SCHOOL?

Attending summer school is *not* required to meet graduation requirements; however, summer school can increase your future course options.

For the student who aspires to . . .

- take four years of fine arts, or
- take journalism all four years, or
- take computer science or engineering all four years, or
- take a study hall every semester all four years, or
- exceed graduation requirements across the core subjects.

Or you just have a lot of time on your hands and need something constructive and structured in your life.

# SOME KIDS WANT TO DO IT ALL! HOW DO I KNOW THEY ARE READY?

Are they up for a challenge?

Do they have very good study and time management skills?

Do they discuss how they're doing openly with their parents?

Are they willing to seek out teachers for guidance?

What are their other commitments?
